

# Your Digital Transformation, Your Way

Consulting &  
Professional  
Services

## From the Closet to the Cloud, Spectrotel Has You Covered

Spectrotel's consulting and professional services remove the complexity of sourcing, scheduling, and managing contractors, vendors, carriers, and providers. We keep the entire process simple so your team can focus on business-building initiatives, and you can feel confident knowing someone is taking care of all the details.

## We Manage Every Aspect of the Project – So You Don't Have To

Actualize your digital transformation with our robust, seamless professional services solution.

### We'll help you:

- Identify the right providers
- Manage your production schedule
- Keep track of tactical details

**Leverage a true end-to-end, worry-free solution that supplements and augments your team and gives you peace of mind.**

## The Spectrotel Advantage

**Our 3-step process provides an easy and fast migration to your new solution**

1

### Assess and recommend

Our experienced engineering team conducts a thorough evaluation of your current business and plans for future growth. Through this analysis we are able to outline a comprehensive plan eliminating surprises and maximizing your budget dollars.

2

### Design and project manage

After our comprehensive discovery process we create a tailored solution specific to your needs. Our dedicated project managers ensure all deliverables, milestones, and timelines meet or exceed expectations.

3

### Implement and support

Enjoy a smooth transition from design to execution with our white-glove installation and 24/7 hands-on support. We manage all the finer details providing you with peace of mind.

## Minimize Stress and Maximize Time with Our Full Suite of Services

Spectrotel can provide expert support for a variety of projects, including:

- | Structured cabling
- | Warehousing
- | Inventory management
- | White-glove installation
- | Network design and consultation
