

Unlocking Seamless Mobility

Spectrotel Mobile Device Management (MDM)—
Simplified for Today's Dynamic Workforce

Take Control and Increase Mobility Flexibility with Spectrotel MDM

Managing your workforce's mobile devices can be a daunting task. Your users want access to corporate systems and data with an "anytime, anywhere, any device" mentality. But meeting these demands requires specialized knowledge and consumes valuable time your IT staff could be spending on strategic initiatives instead. And to top it off, balancing user flexibility with your security requirements adds another layer of complexity.

74% of Global Enterprise IT Leaders report experiencing a **data breach** due to a mobile security issue.

Empower Your Mobile Workforce

The Spectrotel MDM solution minimizes the risks and challenges you face in leveraging mobility for day-to-day business activities, empowering your users to work as they like:

- Easily and expertly manage configuration, updates, and access to corporate data
- Protect both employee- and company-owned devices via seamless management and robust security protocols
- Leverage end-to-end MDM services for remote device management, support, tracking, and security

The Spectrotel Advantage

The Spectrotel Mobile Device Management (MDM) solution offers a dual advantage by tailoring solutions to your unique needs while ensuring operational efficiency.

MDM your way:

Say goodbye to one-size-fits-all solutions. Through our comprehensive discovery process, Spectrotel identifies what you need—and scopes and delivers only the services and software that align with your organizational goals. Whether you require standalone services to complement your existing MDM software or a complete package, we've got you covered.

Operational Efficiency:

Spectrotel is committed to simplifying your device management processes. From executing device additions, deactivations, and changes swiftly and effectively to reducing your overall IT workload, our outsourced model ensures operational excellence. Additionally, we synchronize AP, Procurement, IT, and Service Desk data to provide a single source of truth for your mobile inventory, eliminating discrepancies and streamlining operations.

Spectrotel MDM is a fully outsourced, services-driven solution for managing the complete lifecycle of the mobile devices that contribute to your day-to-day success—including cell phones, tablets, and POS systems.

Benefits include:

Solutions Features and Benefits

Device and data protection:

Safeguard your assets via best-in-class tools and real-time threat detection and response

Organizational standardization:

Maintain control and consistency with remote configuration, deployment, and management of your corporate devices, applications, and files

Compliance made easy:

Simplify without compromise via automated security policy compliance management and enforcement for corporate app and data access—and covering passwords, data encryption, and application and functionality restrictions

BYOD peace of mind for all:

Ensure data protection while respecting your users' individual privacy on their own devices by separating company and personal data and allowing for selective wiping of information

Actionable insights:

Make better and more informed mobility decisions with metric and trend tracking for device usage, compliance status, and security incidents

The Spectrotel Difference

For over 25 years, our customers have been at the heart of everything we do. As a trusted provider of Managed Network Solutions, Spectrotel partners with top technology providers to deliver tailored solutions. Our expert team leverages advanced analytics, AI, and ML to optimize performance across multi-location enterprises. We manage complex IP applications over diverse broadband connections, transforming network data into actionable insights. Spectrotel's strategies minimize downtime and enhance communication, ensuring your network performs at its best and empowering your business for future success.
