

Transform Your Legacy Copper Networks With Spectrotel's Next Generation Voice Solution

SPECTROTEL POTS TRANSFORMATION BOX SOLUTIONS

Ooma AirDial

SPECTROTEL POTS IN A BOX®

The Time Is Now to Digitally Transform Your Voice and Specialty Phone Lines!

Whether you're impacted by price increases or limited by a technology that's rapidly becoming obsolete, one thing is for sure. If you want to stay competitive and future-proof your network, staying on POTS is not an option.

Unlike copper, Spectrotel's next generation POTS Transformation Box Solutions transform the POTS experience into a cost-effective, fully managed and proactively monitored service while also still supporting special services, such as alarms, POS, elevator and fax. Enjoy peace of mind with built in redundancy options, and the flexibility to make changes when you need and want to. And, if you need visibility into your network performance, we can proactively monitor edge devices, even at the line level.

The Spectrotel Advantage

The Leader in POTS Lines Alternatives

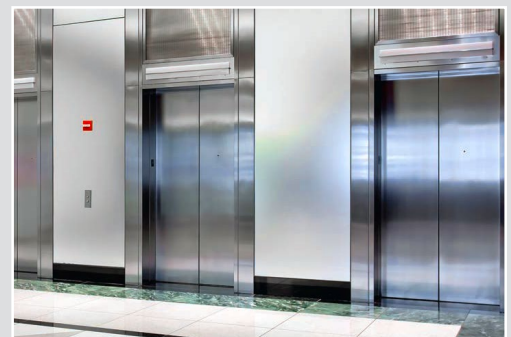

With more than 25 years of experience and a deep understanding of the industry, Spectrotel works with organizations to address their POTS transformation needs holistically, considering and planning for all of the factors involved including expense, backup protection, security, lead time, rollout capacity, and more -- before the transition takes place.

Customers choose Spectrotel for the peace of mind that comes with working with a company who provides the following advantages:

- Comprehensive audit of copper-dependent lines to evaluate needs, recommend best replacement options and plan for the future.
- Complete, all-inclusive migration plan to prevent disruptions and security issues.
- Assessment of risk and compliance issues, especially for heavily regulated industries like healthcare, banking, and government services.
- Knowledge of business-critical applications and guidelines including elevators, fire alarms, POS and emergency boxes.

Network Consolidation

Maximize savings and simplify your network when bundling POTS alternatives together with a Spectrotel primary internet connection for singular management and implementation.

Supported Applications

- Voice
- Fire alarms
- Burglar alarms
- Elevator
- ATM
- Fax
- Point of sale
- Emergency call boxes
- Security gates
- Door access boxes
- Modem data
- Analog lines
- OOBM

Compliant Solution NFPA 72 | UL 864 | UL 60950-1 | ASME A17.1

DEVICE & SERVICE FEATURES	Ooma AirDial	SPECTROTEL POTS IN A BOX®
RJ-11 Analog FXS Ports	4	2 or 8
Battery Backup Protection (8-24 hours)	○	○
Multi-Carrier Single SIM and Dual SIM Failover*	○	○
Compliance: NFPA 72, UL-864, ASME A17.1B	○	○

Stateful Firewall	○	○
Web-Based Management Interface	○	○
• Single Dashboard for Device & Line Management	○	
• Dual Dashboards for Device & Line Management (via SSO)		○
• Device Status (In-Service/Offline)	○	○
• Line Status (Online/Offline)	○	○
• WAN Status (LTE/Wired)	○	○
• Battery Life (up to 100%)	○	Device only
• Line Status Monitoring (SMS/Email Alert)	○	○
• Remote Device Reboot Capability	○	○
• Device Software Firmware Updates (Bug Fixes)	○	○
Device Warranty	1-year limited	3-year extended
Dual Band Wi-Fi Management		○
LCD Display	○	
Heat-Sink and Ventilation Efficiency	○	
Rapid Deployment	○	○
Easy Installation	○	○
Enterprise Grade Security	○	○
Return on Investment	○	○
Uniform bill with Integrated Data Plan	○	○

* Higher anticipated data usage may require a higher 4G LTE data plan

The Spectrotel Difference

Leveraging more than 25 years coordinating and managing disparate carriers and networks, Spectrotel is pioneering the Next-Generation Aggregator provider class to source and integrate best-in-class components and uniquely craft comprehensive, integrated solutions. We dig deep to understand specific organizational requirements, and we take an expansive approach to recommend the optimal technology mix to minimize risk, optimize resources and technology, and modernize the enterprise.
