Jumpstart Your Digital Transformation Solution

| POTS Transformation as a Service (PTaaS)

Don't Get Left Behind

POTS lines will soon be a thing of the past, as carriers are slowly phasing out these networks. You must have a plan to transition to a compatible, affordable and reliable solution in order to avoid continued cost increases and ensure business continuity. But transitioning your voice and specialty lines – POS, fax, alarms, elevators – can be a daunting task.

Spectrotel Makes POTS Transformation Easy

Spectrotel has the industry's most extensive portfolio of POTS alternative solutions, offering cost-effective and resilient solutions to transform your copper networks and future proof your business-critical lines. You can choose your network and features without giving up the reliability of POTS.

The Power of Spectrotel One

As a next generation aggregator, Spectrotel makes it simple to modernize your enterprise with multiple phase solutions for transition and optimization. Let us help you bridge your POTS service from the past to the future with economical, compliant and reliable solutions.

The Spectrotel Advantage

Our 3-step process provides an easy and fast migration to your new solution

1

Assess and recommend

Our experienced engineering team conducts a thorough evaluation of your current business and plans for future growth. Through this analysis we are able to outline a comprehensive plan eliminating surprises and maximizing your budget dollars.

2

Design and project manage

After our comprehensive discovery process we create a tailored solution specific to your needs. Our dedicated project managers ensure all deliverables, milestones, and timelines meet or exceed expectations.

3

Implement and support

Enjoy a smooth transition from design to execution with our white-glove installation and 24/7 hands-on support. We manage all the finer details providing you with peace of mind.

Why have “Plain” or “Old” Telephone Service When You Could Have a New Digital Solution?

SIP Suite of Solutions (SIP Analog, SIP Trunks and Enterprise SIP)

- Realize the benefits of converged communications without breaking the bank and requiring little to no Capex investment
- Enjoy flexibility and rapid deployment via a secure and feature-rich cloud platform
- Experience high-quality voice conversations over your internet connection using your IP-PBX system as a foundation

Spectrotel POTS Transformation Box Solutions

Spectrotel offers **two-industry-leading** POTS replacement box solutions

- Fully managed and monitored proactive service that supports typical POTS use cases including alarm systems, elevators, POS, and feature-rich voice lines
- Manage current and future needs with an advanced feature set including dual SIM 4G LTE and 5G, plus up to 24 hour battery backup protection comes included
- Save up to 30% on your current spend with uniform, predictable and geography-agnostic billing making accounting more manageable

POTS over Broadband

- The industry's most robust portfolio with the four largest cable providers offering business grade cable voice network serving all 50 states*
- Private voice networks offering utility-level reliability and redundancy
- Uniform installation and support via an online portal with the convenience of single invoice
- Bundle with competitively priced internet on the same network for an integrated solution

*wherever cable internet is available

Modernize the Enterprise

Spectrotel's cloud communications solutions help you modernize your network, monetize your technology investment, and amortize your costs as operating expenses – all under one umbrella. You'll get 24/7/365 white-glove support for your human-crafted cloud communications solutions.
