

Evolve With the Future of Voice Communications

| POTS over Broadband

Rethink Your Connectivity Strategy for Critical Applications

As carriers move toward final retirement of their copper networks, you're faced with increasing costs and an unsupported network. You know you need to take action, but transitioning your voice and specialty lines – fax, alarms, elevators – can be a daunting task.

We Make Nationwide POTS Migrations Easy

With Spectrotel's robust voice over anything portfolio, you have options to support your current network architecture and features, so you don't have to give up the capabilities you rely on with copper POTS service. Spectrotel's POTS over Broadband allows for an equally reliable voice and utility line solution, so you can migrate off legacy networks with ease.

Transform Your Legacy Networks

Spectrotel is the only company that partners with the four largest cable providers. Spectrotel POTS over Broadband offers a business grade voice service alternative to traditional POTS lines.

The Spectrotel Advantage

Nationwide Footprint

We have agreements with the four largest cable providers -- wherever they can provide internet, we can provide POTS over Broadband.

Simple

Fixed-price service with unlimited calling within the U.S., Canada, and Puerto Rico with no extra fees and surcharges

Utility Hardened

High-quality service delivered on private networks certified to support alarm, fax, POS, and elevator lines, plus network diversity for alarm systems

Flexible Options

Network consolidation when bundled with internet with 1-, 2-, and 3-year terms

Technology Choice

Option for delivery over wireless for locations not served by cable internet

Hands-On Help

Fully managed implementation process for a smooth transition

One Call to Make

No finger pointing. We take ownership of site work, cutover, and ongoing service.

Features and Benefits

Crystal-clear calling on a virtual private network

Standard features, voice modem, battery backup, and professional installation included

Flat-rated MRC with no hidden surcharges

Network consolidation when bundled with internet

Network diverse voice option

Network monitoring standard with all services

Common POTS features like E911, 3-way calling, call forwarding, caller ID, and hunting included (enhanced features optional)

The Spectrotel Difference

Leveraging more than 25 years coordinating and managing disparate carriers and networks, Spectrotel is pioneering the Next Generation Aggregator provider class to source and integrate best-in-class components and uniquely craft comprehensive integrated solutions. We dig deep to understand specific organizational requirements and take an expansive approach to recommend the optimal technology mix to minimize risk, optimize resources and technology, and modernize the enterprise.

Stay ahead of regulatory changes. Start executing a crafted migration plan with Spectrotel's POTS over Broadband.
