

SPECTROTEL

EVOLVING WITH THE FUTURE OF VOICE COMMUNICATIONS

Tired of increasing monthly POTS rates, hidden fees and threat of decommissioning copper, but need the reliability to transition voice and specialty lines such as fax, alarms, POS and elevators?

Introducing Spectrotel's POTS over Broadband

Transform your Legacy Network

With Spectrotel's robust Voice over Anything portfolio, you can choose your network and features without giving up the capabilities you rely on with POTS. With POTS over Broadband you can migrate off these legacy networks to an equally reliable, less expensive voice solution.

Spectrotel is dedicated to providing crafted solutions backed by our extensive national carrier network, deep technical knowledge and the ability to execute delivering an exceptional customer experience.

Why Spectrotel

Nationwide Footprint

Starting with the 4 largest cable providers and growing, Spectrotel POTS over Broadband offers a cost effective, business grade voice service alternative to traditional POTS lines.

KNOWLEDGE AND EXPERIENCE

Spectrotel combines over 24 years of experience aggregating and integrating telecom services with a team of knowledgeable sales and support engineers to put a powerful and reliable problem-solving force at your fingertips.

SUPPORT SIMPLIFIED

We take full ownership of the design, implementation, and ongoing support of every POTS over Broadband solution. We don't point fingers.

POTS over Broadband

POTS conversions can be hard, but they don't have to be.

POTS over Broadband uses the cable network for connectivity between the customer premises and cable node, transporting voice calls on private networks to ensure crystal clear voice calling and essential services like alarm, fax, POS, and elevator lines.

We make nationwide POTS migrations easy.

Key Features and Benefits:

- ✓ Crystal-clear calling on virtual private network
- ✓ POTS features and benefits at lower costs
- ✓ Flat-rated MRC with no hidden surcharges
- ✓ Unlimited domestic calling within the US, Canada and Puerto Rico included
- ✓ Network consolidation when bundled with internet
- ✓ Network diverse voice option
- ✓ Network monitoring standard with all services
- ✓ Common POTS features like E911, 3-way calling, Call Forwarding, Caller ID and hunting included (enhanced features optional)

Simple

Fixed-price service with unlimited calling within U.S., Canada and Puerto Rico with no extra fees and surcharges.

Utility Hardened

High-quality service delivered on private networks certified to support alarm, fax, POS and elevator lines. Network diversity for alarm systems.

Complete Solution

Standard features, voice modem, battery backup and professional installation included.

Flexible Options

Network consolidation when bundled with internet with 1, 2 and 3 year terms.

Technology Choice

Option for delivery over wireless for locations not served by cable.

Hands-On Help

Fully managed implementation process for smooth transition.

One Call to Make

No finger pointing. We take ownership of site work, cutover and ongoing service.

Stay ahead of regulatory changes. Start executing a custom-crafted migration plan with Spectrotel's POTS over Broadband.

For over 24 years Spectrotel has provided the choice and coordination of any service, any carrier, any speed in any location for a fully customizable and scalable enterprise solution and has bundled that solution with a full suite of services to manage and secure it resulting in the following:

- One network service provider
- One Simple, easy to read invoice, customized to your needs
- "Live," personalized, U.S based customer contact
- Same underlying quality networks (AT&T, Verizon, Comcast, Spectrum etc.) without the hassles and extra cost
- Proactive communication and insights as technology evolves
